Mission

To improve research into all aspects of mental illness, including causes, prevention, and treatment of psychiatric disorders.

Location

Washington, DC
United States

Description

A committee within a professional member organization that advises on policy and education to improve psychiatric care access through enhanced coordination and integrated care models. It focuses on financing mechanisms and advancing models integrating behavioral health with general medical care. The Committee collaborates with other APA committees on technology, regulatory issues, and best practices to support integrated care and bidirectional integration.
