Mission

To improve patient access to behavioral health care by partnering with providers and work with them to develop innovative solutions.

Location

Ann Arbor, MI
United States

Description

Provides individualized consultation, training, and implementation support on the Collaborative Care Model (CoCM) to health systems, provider organizations, and payors. Implementation support includes workflow modification, adoption of population-health approaches, sustainability planning, evaluation support, and fidelity monitoring. Team and role-specific clinical training is provided for primary care providers, psychiatric consultants, and behavioral health care managers.
