Description

A program that promotes perinatal mental health by developing, implementing, evaluating, and scaling approaches for addressing mental health and substance use disorders. Lifeline for Moms: 1) develops and test population-based perinatal mental health programs and related trainings and tools, 2) provides consulting services to facilitate the implementation of mental health into perinatal, obstetric, and pediatric settings, and 3) convenes the National Network of Perinatal Psychiatry Access Programs.

Description

Massachusetts' first and only public academic health sciences center. Their mission is to improve health and wellness locally and globally through leadership and innovation in education, research, healthcare delivery, and public service. Their three graduate schools are at the heart of our world-class research, driving significant clinical and basic scientific advancements.
