

Population Behavioral Health at Cincinnati Children's Hospital

Website

<https://www.cincinnatichildrens.org/professional/support-services/office-population-health/programs>

Mission

To improve health and outcomes for children with behavioral health needs.

Location

Cincinnati, OH

United States

Description

Through data-driven program development and spread, as well as regional and national dissemination and advocacy, this program aims to spread population-level interventions across the continuum of care from prevention and early intervention to high-acuity behavioral health concerns. They have made substantial progress in improving behavioral health access and outcomes through enhanced data visibility.
