Description

The MUSC Center for Telehealth advances access to high-quality care through innovation, research, education, evaluation, and technical assistance. As home to one of HRSA's nationally designated Telehealth Centers of Excellence, the Center rigorously researches, evaluates, and disseminates evidence-based telehealth initiatives and promising practices, including behavioral health integration, to support providers and improve health outcomes in rural and underserved communities.

Government Agency
Description

An agency within the U.S. Department of Health and Human Services (HHS) dedicated to improving healthcare access for underserved and vulnerable populations. HRSA administers programs that provide funding for health centers, workforce training, maternal and child health services, and initiatives to address rural healthcare disparities, HIV/AIDS care, and organ donation. It also oversees the National Health Service Corps and works to strengthen the healthcare safety net nationwide.
